

Pakistani law. Simple questions.

Users ask in English, Urdu, or Roman Urdu. The app retrieves relevant pages from indexed Pakistani law books, then answers with sources.

1,369 chunks

4 law books indexed

732 pages

Constitution, PPC, CrPC, Family Laws

2-3 minute demo pitch

The problem

The law is long. The question is simple.

- Pakistani statutes are lengthy - finding the right article or section takes time.
- People ask in everyday language: "Someone occupied my house. What should I do?"
- A general web search rarely returns the exact document, section, and page.

The solution

A RAG chatbot - it retrieves, it does not invent.

Answers only from retrieved text

What is indexed today

- Constitution of Pakistan, 1973 - 326 chunks, 240 pages
- Pakistan Penal Code, 1860 - 328 chunks, 178 pages
- Code of Criminal Procedure, 1898 - 703 chunks, 307 pages
- Muslim Family Laws Ordinance - 12 chunks, 7 pages

Adding a new book is dynamic: an admin uploads a PDF, and chunks plus embeddings are created. Already indexed laws are not processed again.

Three questions, 60 seconds

1. What are fundamental rights under the Constitution?

2. Someone occupied my house with armed men. What should I do?

3. What is Section 144? - answered from CrPC, with sources

Answers are point-by-point, with article or section citations. Sources show the law name, page, and match score.

This is not a lawyer. It is information from indexed books.

- If a section or punishment is not in the index, the system must not invent it.
- Random or meaningless input is rejected.
- PDF upload is admin-only.

Pakistan Law AI Assistant - Pakistani laws, searchable in your language, with sources.
